Privileged and Confidential - Prepared at Request of Counsel

Eugenia,

An additional comment that AECOM raises is the very small proposed sample size for crab. While the QAPP states that this is intended to be a initial, preliminary sampling effort with supplemental data to be collected in 2014, one sample per area for a total of 8 samples may be too limited to be meaningful. For comparison, CPG analyzed 41 muscle & hepatopancreas samples, 21 muscle only samples, 24 carcass samples, and 7 hepatopancreas only samples.

Best regards and Happy Holidays!

Betsy
